*"Straight From  
The Source"*

# ABOUT US

Salt Source (Pvt) Ltd. is a salt processing and trading company based in Pakistan and is part of the Iron Curtain Group. For the last 10+ years the IC Group has made strides in different industries, ranging from security services and products, facilities management, tourism, trading and even steel fabrication.

Salt Source as the name indicates works directly from the source of the world famous Pakistani Salt Mines, having facilities at the near the center of the Khewra, Warcha and Kala Bagh Mines. Salt Source offers a range of food grade and other specialized salt products to different parts of the world and locally. Our services also extend to packaging, processing, value addition and transportation management.

Salt Source specializes in salt products, mainly the world famous rock salt of Pakistan. We believe in vertical integration and hence, are involved in all stages of the salt supply chain from mining till the finished, processed and packaged salt products.

We aim to market and distribute a range of refined edible, food grade, salt crafts, bath salts and even all types and quantities of industrial salt. The variety of options include dark pink and pink natural salt, white rock salt, black salt and a wide range of salt products.

Salt Source has developed a strong research facility which enables us to validate the quality and reliability of our salt products. We use a strict code of ethics and quality checks that make our products always have an edge over the market products. With techniques and standard operating features like only using SS 316L machinery for our salt processing, monitoring the use of additives, getting our raw material straight from the source and even then using mines that are accredited and well tested for the best type of products.

With a strong compliance and regulations team on board we make sure all our products are certified and compliant according to all international standards. A combination of all of these practices makes us bring the best rock salt in the world straight from the source to you.

# EDIBLE SALT

Our range of edible salt and gourmet are made from the rock salt from the Pakistan salt ranges which are varied from white, pink and dark pink.

This is the salt that is mainly going through the cutting, washing, refining, scanning etc processes to give you a pure, clean and global standard eat-able salt used in many different households, restaurants etc. all over the world.

*The salt is crushed and processed in different grain sizes as per the client or demand specifications.*

*Here are some of the grain sizes that are being used in pink salt that range from 0.2 mm to 6mm:*

A close-up photograph of pink salt crystals in a wooden bowl. The salt crystals are irregular, translucent, and range in color from light pink to a deeper, more saturated pink. They are piled together, with some crystals catching the light and appearing more vibrant. The wooden bowl, which is the source of the salt, is visible in the background, its grain and texture softened by a shallow depth of field. The overall lighting is warm and soft, creating a gentle, inviting atmosphere. The text 'PINK SALT' is centered over the image in a clean, white, sans-serif font.

P I N K   S A L T

## FINE PINK SALT

## COARSE PINK SALT

## PINK SALT

Our Pink Himalayan Salt is a pure form and is the finest quality Himalayan Salt available. It is hand-mined salt found naturally deep inside the pristine Himalayan Mountains formed in the Jurassic era. The high mineral content of the Himalayan salt crystals range in color from sheer white to varying shades of pink to deep reds. Its pink colour is due to the 84 different trace minerals found in it that cater to different health benefits and needs of the human body. For centuries, Pink Himalayan Salt has been used as folk remedies for a variety of health issues - this salt is known for its healing properties and is used by health professionals, spas and individuals who are interested in utilizing natural products to heal the body and relax the mind. Stimulating circulation, lowering blood pressure and removing toxins such as heavy metals from the body are just a few of the many benefits of Himalayan Pink Salt.

A wooden bowl, partially filled with white salt crystals, is the central focus. The bowl is made of light-colored wood with visible grain. It sits on a surface covered with a thick layer of white salt crystals. The background is a soft-focus field of these crystals, creating a textured, monochromatic environment. The lighting is even, highlighting the granular texture of the salt and the smooth curves of the bowl.

W H I T E   S A L T

## FINE WHITE SALT

## COARSE WHITE SALT

# WHITE SALT

Our white Himalayan rock salt is one of the purest sources of sodium chloride in the world. Unlike sea salt it does not go through much processing and has no additives. It's pure white appearance is accredited to it being extracted from halite crystals found in the Rock salt mines of Pakistan.

Our white salt can also be iodized as per the customers demand. Our Salt Source Iodized salt is used in various food-related industries like bread making, confectionary, cereals, bakery, spices, pickling, cheese-making, etc. Added Iodine helps in prevention of Iodine-deficiency disorders while sodium and other minerals help in better functioning of the body. Using iodized salt is considered the easiest and cheapest means for the supplementation of Iodine. Salt Sources iodized salt is continuously satisfying our customer requirements.

FINE BLACK SALT

COARSE BLACK SALT

## BLACK SALT

Our Black Salt also known as kala namak or Himalayan black salt, comes from the same Himalayan mines of Pakistan. It was used in Ayurvedic medicine for its holistic, therapeutic properties. It is filled with minerals that are insoluble, making them harder to be absorbed by the body. Now black salt is commonly used in cooking and is a popular ingredient in recipes. It has volcanic origins and is made up of sulphur compounds which contribute to its smell and taste. It is also made up of iron and potassium chloride. Black salt has antioxidant properties and has surprisingly low sodium levels. It also contains important minerals like iron, calcium, and magnesium, which are essential to healthy bodies.

Other added benefits of black salt include: reducing heartburn, helping in digestion, promoting heart health and decreasing diabetes complications.

CRAFTS

# LAMPS

# NATURAL

Our natural shaped lamp ensures better sleep by creating a good sleeping atmosphere. Lighten your room and add calmness for a better surrounding. It's pretty useful as a night light which creates a warm, pleasant and relaxing amber light. Our lamps are a great companion for the people who work, it gives a soothing vibe to your work space and helps relieve your work stress. The beauty of these holders is that they are incredibly versatile and can easily adapt to any style of interior, from a wooden rustic living room to a contemporary reading nook!

# COOKING SLABS

Himalayan pink salt blocks, plates, and bricks are harvested from deep within the ancient Himalayan mountain range of Pakistan. There, they have remained protected from pollution and impurities for centuries, making this what many consider the purest, cleanest salt in the world. The salt is mined as large, meteor-like boulders and later sliced into slabs, blocks, bricks and plates as well as sculpted into bowls. The Salt Source Himalayan Salt Cooking Slabs are nature's cook top and serving platter in one, offering many creative culinary uses while delivering the benefits of natural, pure salt with no chemicals or additives.

## ANIMAL LICK SALT

## MINERAL LICK SALT BENEFITS

A mineral lick (also known as a salt lick) is a place where animals can go to lick essential mineral nutrients from a deposit of salts and other minerals. Mineral licks can be naturally occurring or artificial (such as blocks of salt that farmers place in pastures for livestock to lick). Natural licks are common, and they provide essential elements such as phosphorus and the biometals (sodium, calcium, iron, zinc, and trace elements) required in the spring-time for bone, muscle and other growth in deer and other wildlife, such as moose, elephants, tapirs, cattle, woodchucks, domestic sheep, fox squirrels, mountain goats and porcupines. Such licks are especially important in ecosystems with poor general availability of nutrients. Harsh weather exposes salty mineral deposits that draw animals from miles away for a taste of needed nutrients. It is thought that certain fauna can detect calcium in salt licks

## ANIMAL LICK SALT FOR ALL PETS

These Himalayan crystal salt licks are more than a salt, rather these are complete health supplement both for human and other living creature including those of animals, horses and birds, cows, buffaloes, cattle, sheep, camels & Pet animals licking salt

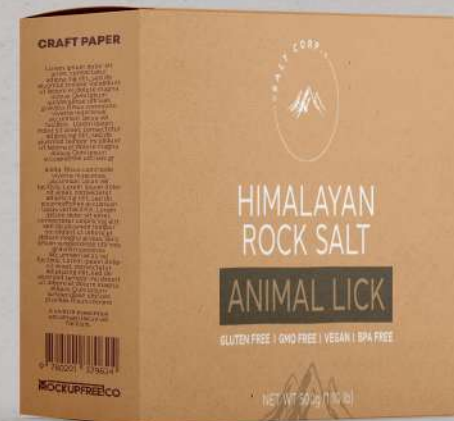

We select the food grade rocks of salt crystal to make these natural licks. These rocks are hard and animal can't bite the chunk off as compare to artificially made licks. These are weather resistant. Licks are made in different weights and provided with an handy rope for easy hanging on fences and branches of trees in the pasture.

# NATURAL

Himalayan pink salt blocks, plates, and bricks are harvested from deep within the ancient Himalayan mountain range of Pakistan. There, they have remained protected from pollution and impurities for centuries, making this what many consider the purest, cleanest salt in the world. The salt is mined as large, meteor-like boulders and later sliced into slabs, blocks, bricks and plates as well as sculpted into bowls. Our cooking slabs come in two different sizes.

## COMPRESSED

Salt Source Compressed Salt Licks are 100% natural and additive-free deposit of mineral salts for farm as well as other domestic animals, to supplement their nutrition. Himalayan Salt Licks in particular are 100% natural and pure forms of Mineral Salts, formed over 250 million years ago as a direct result of massive geological changes and earthquakes that trapped ancient oceans beneath the earth's crust. These trapped oceans over the course of roughly 250 million years, crystallized and formed Rock it and we have made this ancient rock salt available to supplement the varied dietary needs of living beings.

# BATH SALTS

The highest quality wholesale Himalayan Pink Bath Salt available, Salt Source Himalayan Salt is available in a wide range of grain sizes suitable for bath and spa application. # CERTIFICATIONS

# INDUSTRIAL SALT

Leather Industry

Dyes

Textile

Power Plants

Oil Mills

## TEXTILE DYEING GRADE SALT

One of the many exciting grades of Salt Source is textile dyeing grade. Pakistan is a country well known for its production of cotton, textiles. In textile dyeing, salt being the transferring media, is used in the exhaustion of dyes into fabric. It plays as an iconic force to transfer the dyes to the fabric. If the quality of salt is not correct, it results in a bad colour exhaustion, visible on the fabric.

## DYES MANUFACTURING SALT

Salt is not only used to colour the cloth but is also an important raw material for the dyes which are used in the colouring of the cloth. Salt Source again is a provider of salt to many dye manufacturers. We also manufacture salt for the typical requirements of pharmaceutical and food grade dyes which are very sensitive to the impurities present in salt.

## SOAP & DETERGENT GLYCERINE

Salt is one of the important raw materials used for the manufacturing of soaps, detergents and glycerine. In soap and glycerine manufacturing process, after the saponification reaction, soap is washed with concentrated brine solution (NaCl) to separate glycerine. Almost as a rule, the solubility of soap in water increases with an increase in the size of monovalent cations.

## CHLORE ALKALI GRADE

The basic raw material for the membrane Chlor-Alkali is purified Sodium Chloride. Quality of the salt plays an important role in the proper and trouble-free production of Chlorine and Caustic Soda (Sodium Hydroxide}. The introduction of membrane technology into the chlor-alkali and electrolysis has generated increased demand for quality salt. The life of membrane cell and the consumption of electricity is totally dependent on the quality of salt and the level of impurities are normally in ppb and not in ppm.

## OIL DRILLING GRADE

Salt Source supports a booming export market for the oil and gas drilling grade of salt. We emphasise on quality and timely shipments which are the demands for the drilling companies. At all the levels in our organization, we are committed to achieving the highest levels of quality in products and service.

## WATER SOFTENING GRADE

Water softening is carried out to soften the water to be used in boilers and various other industrial, residential and commercial applications. Water softeners are filled with ion-exchange resins that need to be re-generated by salt brine. The resins and the plant are both expensive and their misuse can lead to the disfunction of plant. The water-softening technicians are aware of the fact that poor quality of salt can plug the valves and pipes besides making the resins become worn out before their stipulated time.

## FLOSSY AND SHEEP CASING GRADE

Salt has been used as a direct preservative for thousands of years as an extension agent for meat and fish products. Salt added as dry salt or brine is used in combination with techniques such as drying, soaking and fermentation, as well as in combination with other preservative compounds. Salt Source is playing its due role with the contribution of excellent quality salt for the sheep casing industry. Leather is made from animal skins or hides that have been chemically treated to preserve their quality and natural beauty. Hide is cured either by wet salting or brine curing. Brine-curing is more common than wet-salting, as it's considered a faster and easier method.

## NITRITE SALT

Salt Source plays a vital role as a preservative for meat and poultry products. The use of salt as preservative produces a pink colour and special flavour in meat. Nitrate present in salt is converted to nitrite by bacterial action during processing and storage. Nitrite, in meat, greatly delays development of botulinal toxin. It develops cured meat flavour and retards development of rancidity and off-odours, off-flavours during storage. Inhibits development of warmed over-flavour and preserves flavours of spices, smoke and other flavour enhancement agents. Sodium nitrite rather than Sodium nitrate is most commonly used as an additive in Sodium Chloride for curing purposes.

## OIL REFINERY GRADE

Salt Source is usually used in oil refineries and petrochemical industry. In oil refineries, when direct stripping steam from the stripper column is released, the hydro-desulfurization units for jet and diesel require coalesce and salt dryer. The salt dryer completely avoids product off specification in water and appears hazy. Small particles cause severe corrosion in downstream system due to salt carry-over.

## DE-ICING SALT

Produces and formulates salt for de-icing/snow melting purposes for winter road maintenance and exports to several locations worldwide. De-icing Salts prevent 90% of road accidents in snow-prone areas during winter seasons. A thin layer of snow sheet on the roads, also known as 'black ice' is the major cause of road accidents during snow season, salt is sprinkled on these icy roads to melt the ice-sheet and make traction easier and safer to motorists.

## PHARMACEUTICAL GRADE (DRIP)

Salt Source offers different grades of industrial salt to pharmaceutical industries ranging from Pyrogen-free salt. It also supplies another special grade of salt which is the Bromine-free grade. The Pyrogen-free salt exceeds the BP, EP, USP etc. standards. Another special grade supplied to the pharmaceutical industry is the Bromine-free grade.
